brackets for LED bar  
illumination

# T-Flex® 70 Outdoor

Aluminium outdoor tensioning system for large format printed or sublimated textile, now with a new type of stainless steel wall and troughlight brackets.

[www.comhan.com](http://www.comhan.com)

## T-Flex® 70 Outdoor:

- Easier and quicker to assemble than conventional outdoor tensioning systems.
- Easy wall mounting with stainless steel wall brackets.
- Can also be (back)lit using LEDs.
- Only 70 mm deep!

### Available:

- Available from stock at standard length of 6100 mm in a natural anodised version.
- Available on request in almost every RAL colour.
- Dimension guidelines: max. 5000 x 2750 mm, depending on chosen substrate.
- Customised on request and also available as pre-assembled semi-manufactured product.
- Also available: reinforcement profile and pre-assembled wall and troughlight brackets.

### Fabric can be quickly and easily replaced

Change the fabric quickly and easily thanks to the cover's spring-loaded screws. Loosen them, open the cover profile and change the fabric. Tighten the screws again and the fabric will be properly locked in the system once more.

### Osram LED lighting

Brighten the T-Flex® 70 Outdoor billboard system clearly and evenly (max. 3 metres) with the SlimLine® S1 LED trough lighting, featuring Osram LED technology. The trough light features solid stainless steel brackets, with which the system can be mounted directly on to the wall (as such no additional drilling required). Optimal illumination is created thanks to the smart angle of the brackets.

15. 139758	T-connector 40mm for article 133612/3	anod
16. 139738	Drilling template T-connector 139758	

The advantages in a nutshell...

- **More environmentally friendly** due to the use of textile/fabric instead of PVC banner material.
- **Just 2 profiles:** the tension frame and the cover profile.
- Fabric is **easily changed** thanks to the smart cover profile combined with the 'spring-loaded screws'.
- **Reliable and quick** to assemble, a tensioning system for outside and inside.
- Suitable for different types of **fabrics/knits/textiles or tensile fabrics.**
- **Optimal illumination** (frontlit) possible with the SlimLine® S1 LED trough light (Osram LED technology), featuring solid stainless steel brackets.
- **Backlit possible** with 175° LEDs, mounted on aluminium composite plate.
- **Fast wall mounting** and less drilling with new type of stainless steel wall and troughlight brackets.
- **Suitable textile types:** including Samba (berger textiles), Artist Mambo (Pongs) and Speedy Outdoor (Krea Technische Textilien).

## Tension fabric systems by Comhan

30 years ago, Comhan pioneered the first tension fabric systems on the (international) market. Comhan now supplies ten different tension fabric systems from stock for various applications. All of them excellent systems with names known in the industry as EasyFlex®, BillBoardFlex®, DainoFlex® and T-Flex®.
