

TERRACE® 50

Terrace® is a collection of aluminium profiles and accessories for the manufacture of permanent and movable promotional terrace screens. The screens can be easily and quickly assembled and positioned.

Transparent screens

The Terrace® 50 system is currently also used to make [transparent screens](#) [1]. Think of prevention screens or splash guards for stores, supermarkets, offices and reception areas.

Terrace features

(delivery time for lacquered & anodised). At your request and according to your specifications, Terrace profiles are cut to size, pre-drilled and delivered as a building kit.
