Varia-Click system

An innovative aluminium click system specially developed for decorative façade and wall covering. Possible surface treatments: **powder coating, anodising & sublimation (wood look, stone look and metal look).**

Varia-Click system... click and done!

Varia-Click is a two-part aluminium system that allows you to simply 'click' aluminium profiles onto the façade/wall/ceiling. The basic profile is mounted first and the upper profile is then simply clicked on top.

The upper profile is also available in wood look! A perfect low-maintenance and lighter alternative to wood slats/profiles.

Varia-Click can be used for:

- Façades
- Slatted walls
- Ceilings, indoor & outdoor
- Public spaces
- To hide cords and cables
- On trade shows and exhibitions (stands)
